ELECTION FRAUDS

WASHINGTON MEN IN TROUBLE IN PHILADELPHIA.

ARRESTED FOR "REPEATING"

REPUBLICAN TICKET THE ALLEGED BENEFICIARY.

Philadelphia Newspaper Hired a Mar to Join the Conspiracy and Then to Turn Informer-Arrested Men Are Government Employes.

PHILADELPHIA, Nov. 10 .- As the result of an investigation conducted by a local newspaper, five men, all residents of Washington, were to-day held in bail for court on the charge of repeating, impersonating election officers, and making fraudulent returns. The defendants are John F. Sheehan, R. M. Drinkert, William Cook, Harry McCabe and George Kirk-land. All but one are said to be in the government's employ.

It developed that Kirkland had been employed by the newspaper mentioned to enter the conspiracy. He was the principal witness to-day. The testimony involved several prominent Republican politicians in this city and a lieutenant of capitol police at Washington The fraud is alleged to have been ac-

complished in the Thirteenth division of the Seventh ward and the election papers of this division were produced in evidence. The returns showed a vote of 337 for Colonel James E. Barnett, the Republican candidate for state treasurer, and five for William T. Creasy, the Democratic can-

rest, said his name was George Wright, described the trip from Washington to this described the trip from Washington to this city of the alleged repeaters on Monday night. He then related in detail all that happened from time of their arrival until their arrest at the railroad station on election night. On Tuesday morning, he said, he and William H. Cook went to the house of Deputy Coroner Samuel Salter, accompanied by Lieutenant Joseph G. Rodgers, of the capitol police. Lieutenant Rodgers, Kirkland declared, was in charge of the party when it left Washington. At Salter's house, they met the deputy coroner and John Silverman, one of the election inspectors. Continuing, the witness said:

folded and scaled, and told us they were to go in the box as soon as we got to the polling place. On our arrival there, Silver-man and Cook unlocked the boxes and we put the ballets in. There were about 200, I

man and cook embocked the boxes and we put the ballots in. There were about 200, I judge."

Kirkland said he acted as minority inspector, under the name of Clarence McCabe, the return inspector, and that Cook impersonated E. E. Rankin, the judge of election. During the afternoon, witness asserted, fifteen additional votes were marked by Cook and Silverman and placed in the box. The last twenty-four voters were handed specimen ballots, which witness thought were destroyed after the polisionsed. He said 124 votes were actually cast, and that the number returned was "29 or thereabouts."

Kirkland said he acted in the matter at the instigation of a newspaper reporter. He was paid 315 for his work at the polisiby Lieutenant Rodgers, he said.

William Hamilton, the judge of elections, testified that he was unable to officiate, owing to lilness and to the fact that, in order to do so, he would have to resign his position as laborer in the postoffice.

The clerk of the hotel at which the Washington men stopped Monday night, said the bill was paid by a prominent local Republican politician.

HANGED FOR WIFE MURDER. lbert Becker, Whose Crime Was Like Luctgert's, Pays Extreme Pen-

CHICAGO, Nov. 16.-Albert August Becker, the German butcher who, on January 27 last, murdered his wife, Rachael, and afterwards chopped up and boiled the remains in order to dispose of them, was banged in the county jall at 12:05 o'clock Becker's neck was not broken by the

fall, and it was sixteen minutes before he was pronounced dead On the scaffold, Becker protested his in-

murderer.

The case of Becker, in many ways, bore murderer.

The case of Becker, in many ways, bore a remarkable similarity to that of Adolph Luetgert. Both the condemned men were butchers, and the motive for the crime was the same in both instances, the desire to get rid of the wife in order to marry a younger woman. The manner of committing the crimes was also much the same, both men, according to the testimony, being extremely brutal in the killing and both used the same means to dispose of the body, by boiling and burning. It was proven at Becker's trial that, after killing his wife, he had chopped her body to pieces, then boiled the remains on his kitchen stove, afterward burying the remains in various places. As in the case of Leutgert, the rings of the murdered wife played no small part in the testimony leading to the conviction. Like Luetgert, also, Becker endeavored to explain his wife's disappearance by saying she had eloped with another man. Becker made several confessions. In his first made several confessions. In his first statement, he said he had drowned his statement, he said he had drowned his wife in Lake Michigan. Later he endeav-ored to implicate in the crime the father of the woman whom he married after mur-dering his first wife, and to the last he stuck to this version.

"The most noteworthy feature of the time is the rise in prices. Cotton rose on Wednesday to 7.81 cents with much excitement, putting the price 212 cents higher than it was a year ago, and yet it was still higher in September, 1897. Wool has risen relatively more, about 10 per cent in two weeks, and the average of 100 quotations by Coates Bros. is higher than it has been at any other time since May, 1833. Pigiron has risen further, \$25 being quoted for anthracite No. 1, the highest price since January. 1883. But hides are at the highest point since January, 1873, having risen all the year, with very little reaction. Prices of products have not correspondingly advanced. Leather and boots and shoes were higher in November, 1885, than they are now; cotton goods were higher in January, 1896; woolen goods in July, 1894, and even the products of Iron, though greatly advanced, are not as high as they were in January, 1890. Such wide discrepancies in advance cause much embarrassment, but are the natural characteristic of a rise which is mainly due, not to concerted ac-tion in any trade, but to the pressure of a
